CHAPTER I

INTRODUCTION

1.1 Background

Management of finance and accounts has been an actual issue for a long time. People are less likely to keep track of their spending, be it, in checkbook or even spreadsheets. Despite that, for the recent decades, it has got a new perspective with the advent of modern technologies and the internet which is becoming more and more accessible.

Expenses Tracker is a way that can help us to keep up with our spending. Not only that, it can help us pinpoint areas that we have been spending and track upcoming bill payments.

It is a web-based system that can keep track of their expenses and determine whether they are spending as per their set budget. Potential users need to input the required data such as the expense amount, merchant, category, and date when the expense was made. This mobile system is a full detailed expense tracker tool that will not only help users keep a check on their expenses, but also cut down the unrequired expenses, and thus will help provide a responsible lifestyle.
